

Search the App Store or Google Play for Linphone and install the application. In this example we'll use the iOS version.

WELCOME

This assistant will help you configure and use your SIP account.

CREATE ACCOUNT

USE LINPHONE ACCOUNT

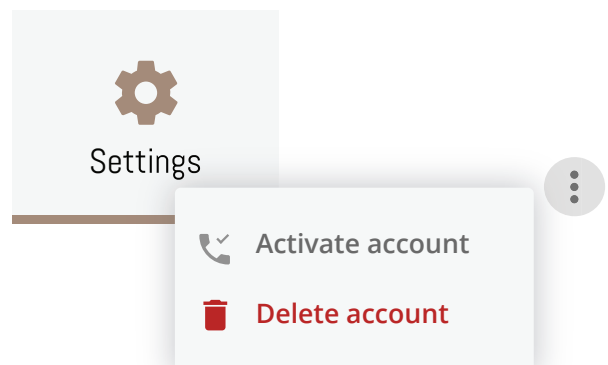

USE SIP ACCOUNT

FETCH REMOTE CONFIGURATION

Open Linphone after the installation and choose "USE SIP ACCOUNT" from the mainscreen.

ContactSuite

Now visit [ContactSuite](#) and go to **VoIP accounts** to open the settings of the VoIP account you wish to use with Linphone. Make sure the account is set to activated. Keep this screen open for setting up Linphone. You'll need the username, password, account and domain data for setting it up.

Linphone App

Enter the data from the VoIP screen that we just looked up into Linphone according to the overview below. When you're finished click [LOGIN]

From ContactSuite	In Linphone
Account	Username
Internal number	Display name
Domain	SIP Domain
Password	Password

USE YOUR SIP ACCOUNT

Enter your username and password with your SIP domain.

USERNAME

Authentication needed

Connection failed because authentication is missing or invalid for 7f2f5fbd-583d-458a-8342-18e44c2@live.registrar.massxess.nl.
You can provide password again, or check your account configuration in the settings.

Cancel

Confirm password

Go to settings

No worries, it's okay that there's an error. Now enter click on **Go to settings** and click on the account you just created. Turn **More options** ON and from **ContactSuite** enter the following information:

From ContactSuite	In Linphone
Username	User ID

Linphone is now ready to use.
